

ARGITOX

BOTOX BOOSTER

BOTOX BOOSTER BASED ON ACETYL HEXAPEPTIDE-8
AND AMINO ACIDS

FROM THE ITALIAN RESEARCH

ARGITOX
BOTO BOOSTER

ARGITOX and its application protocol represents a revolution in the field of aesthetic medicine.

The treatment brings all the advantages of botulinum toxin without using it.

It can be used to prolong the duration of botulinum toxin as a BOOSTER and it can be used as a mesotherapy product with a powerful lifting effect.

BOTOX BOOSTER - LIFTING EFFECT

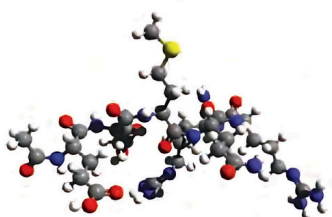

This is thanks to the use of Acetyl Hexapeptide-8, also known as Argireline.

This molecule reduces the tonic contraction of the facial and neck muscles, responsible for the appearance of wrinkles, as happens with botulinum toxin, but at the same time improves the quality of the skin, hydrates it, reduces dilated pores, reduces the redness and hyperpigmentation, reduces sebum production and generally makes the skin healthier.

MADE IN ITALY

ARGITOX is available in a box of 5 ampoules of 5ml and in a box of 2 ampoules of 5ml

INGREDIENTS:

Aqua, Acetyl hexapeptide-8, Sodium hyaluronate, Choline bitartrate, Proline, Thiamine HCL, Sodium dehydroacetate.
